

NONVIABLE VACCINE RETURNS

What NOT to Return to McKesson

The following items should *NEVER* be returned to McKesson:

- Used syringes, with or without needles;
- Broken vials;
- Wasted products such as a syringe that was drawn up but not used;
- Any multidose vial from which some doses have been withdrawn;
- IG, HBIG, PPD;
- Diluent (expired or not expired); or
- Private-purchased vaccine.

The items listed above should be disposed of according to usual medical biosafety procedures, and according to your immunization program's procedures.

What Should be Returned to McKesson

The following items should be returned to McKesson:

- Spoiled or expired product in its original vial or manufacturer pre-filled syringe.
- Unused manufacturer pre-filled syringes with an NDC printed on them.

Federal excise tax (FET) credits can only be processed for unopened vials and for unopened manufacturer pre-filled syringes. Returns of product other than these are not eligible for FET credit.

REMINDER: You must contact your VFC program office before returning any vaccines to McKesson Specialty Distribution.
