## **Public Water Systems Capacity Development Program State Fiscal Year 2023 Annual Implementation Report**

### **INTRODUCTION**

The Federal Safe Drinking Water Act Amendment of 1996 (SDWA) requires that each state implement a Capacity Development Program to improve the technical, managerial, and financial capacity (TMF) of the state's public water systems (PWS) and to prevent the creation of new public water systems that do not have the capacity to comply with current and future provisions of the SDWA. This report describes Mississippi's Capacity Development Program and outlines the implementation results for the State Fiscal Year (SFY) 2023, which covers the period from July 1, 2022, through June 30, 2023. Submission of this report to the Environmental Protection Agency (EPA) Region IV in Atlanta, GA, represents one of the capacity development reporting milestones required by EPA to avoid withholdings from the FFY-2024 Drinking Water State Revolving Fund (DWSRF) capitalization grant.

### **NEW PUBLIC WATER SYSTEMS' CAPACITY DEVELOPMENT**

To comply with the capacity development requirements of the SDWA for new systems, the State Legislature enacted the Mississippi Safe Drinking Water Act (Section 41-26-8, MS Code of 1972 Annotated) to require that all new community and non-transient non-community public water systems be approved by the Mississippi State Department of Health (MSDH) prior to beginning construction. During the review/approval process, MSDH is required to ensure that each proposed new public water system has the technical and operational capacity to comply with all SDWA requirements. This process is effectively the Program's first "control point," or point at which the State can exercise authority to ensure the demonstration of a newly proposed system's capacity to serve its customers from the *technical* side. Another control point created by the State Law's revision is the requirement that, prior to approving a new public water system, MSDH must have written certification from the Executive Director of Mississippi's Public Utilities staff that the new water system has the *managerial* and *financial* capacity to comply with all SDWA requirements. There have been no changes in the State's legal authority or control points since the inception of the Capacity Development Program.

### **EXISTING PUBLIC WATER SYSTEMS' CAPACITY DEVELOPMENT**

Implementation of a capacity development program for existing public water systems is a much more difficult task than it is for new public water systems. The State of Mississippi has 1,190 public water systems that are subject to the requirements of the SDWA. Since Mississippi is a rural state, the vast majority of these systems are small with limited financial resources. It is therefore impossible to develop a mandatory program in the State that would solely force all these small systems to immediately make the necessary capital improvements to achieve the technical, managerial, and financial capacity needed to comply with the SDWA. Additional requirements to the SDWA, such as the Ground Water Rule, Lead and Copper Rule and/or the Disinfection By-Products Rule, have required small systems to make necessary improvements or consolidate their system with other surrounding systems. Regardless, the method implemented by MSDH consists primarily of two components: 1) stringent enforcement of existing laws and regulations, and 2) implementation of a capacity assessment rating system and technical assistance procedures.

## **ENFORCEMENT**

MSDH stringently enforces the water supply laws and regulations, such as those related to: 1) SDWA water quality standards, 2) waterworks operator certification, 3) overloaded water systems, 4) corrosion control treatment facilities, 5) cross-connection control, and 6) water system board member training. By strictly enforcing these laws and regulations, MSDH helps ensure that a safe supply of drinking water is provided. Strict enforcement also encourages water systems without adequate capacity to seek alternate methods of compliance, including the pursuit of mergers or regionalization with neighboring viable water systems. In most cases, these mergers/regionalizations (or "consolidations") result in the creation of much more viable public water systems in the capacity assessment categories. Furthermore, recent Congressional action has given states additional support to force water system consolidation where compliance problems are evident in the management of the system. Primacy package information for this provision is expected during FY24 from the EPA.

## **CAPACITY ASSESSMENT**

MSDH has developed a Capacity Assessment Rating Program to rate the capacity of existing systems. The technical, managerial, and financial capacity of each public water system is rated annually during inspections conducted by MSDH regional engineering staff. The maximum rating possible is "5.0", and a rating of "0.0" is the minimum. The rating is determined using Capacity Assessment Forms (CAFs), which consist of three major sections: 1) Technical, 2) Managerial, and 3) Financial. Each section includes key questions designed to identify those tasks that a public water system should routinely accomplish in order to demonstrate their capacity to comply with all current and proposed requirements of the SDWA and Mississippi's Safe Drinking Water Act.

The CAFs are developed by MSDH in conjunction with an Advisory Committee consisting of representatives of stakeholder organizations such as the Mississippi Rural Water Association; the Mississippi Municipal League; the Mississippi Water & Pollution Control Operators' Association; Communities Unlimited, Inc. (CU); Mississippi Board of Supervisors; Mississippi Development Authority; Public Service Commission, United State Department of Agriculture – Rural Development, etc., as well as selected water system managers and operators from throughout the State. Each year, prior to the annual Advisory Committee meeting (typically held in the last quarter of the state fiscal year), MSDH staff reviews and evaluates the program, discusses the strengths, weaknesses, and any related problems which may have arisen during the fiscal year. The staff then recommends changes to be considered by the Advisory Committee. Later at the Advisory Committee meeting, the recommended changes are presented for their review and comment. Additional suggestions may be offered during the course of the meeting beyond initial staff recommendations. At the conclusion of the meeting, MSDH, using the Advisory Committee's suggestions, commonly will make changes as needed to the Program's strategy for the following year's CAFs.

During FY2023, the committee was able to convene through in person on April 11, 2023. During the course of the meeting, it was determined that the structure of the capacity assessment would move forward with the integration of asset management into the management questions under M4 affective FY-2024. To support this concept moving forward, a significant portion of the time was dedicated to discuss the requirements of the American Water Infrastructure Act (AWIA) of 2018 as it pertained to the Capacity Development program and the mandate of asset management inclusion into the program. AWIA specifically requires that states modify their capacity development program strategies to encourage the concepts of asset management. The Bureau of Public Water Supply Director reminded the committee that the program must evolve to account for the new requirements. The Bureau Director provided an overview of the strategy that was submitted to Region IV on December 26, 2022 and later approved March 3, 2023. In his presentation of the strategy, he noted the 6 elements of the capacity assessment strategy. The initial

5 outlined the following area: Methods or Criteria to Improve Technical, Managerial, and Financial Capacities; Factor in Plan to Encourage Capacity Development; Authority to Assist PWS in Compliance, Partnership Development, & Operator Support; Baseline and Measurement of Improvements; Stakeholder Involvement in the Program. With the advent of AWIA, the sixth outlining the strategy to Encourage Asset Management for water systems was added. The Director noted that Bureau has been actively promoting asset management in a multitude of ways including but not limited to: board management training, technical assistance, the sanitary survey process, engineering plan review, and drinking water operator certification. He further noted that the new strategy codifies how those processes will be expanded and augmented through additional training, potential enforcement actions, funding activities, and plan development at the system level. The overall strategy as approved by the EPA was forwarded to the committee per their request. He reminded the Committee of the staggered approach to give systems enough time to gather the proper information associated with a full and complete inventory of their system. In the Bureau's estimate, a good full two years to gather the complete inventory followed by a two-year period to implement the remaining functions of a proper asset management system as outlined in EPA guidance. While it will slow the full implementation process, the Bureau believes this to be prudent in the current climate of competing regulatory issues that PWS are encountering. It will give the Bureau the opportunity to define how an acceptable asset management plan should be structured with reasonable standards and allow for a full collection of a systems inventory including its distribution system. A copy of the State's approved Capacity Development Amended Strategy for Existing Public Water Systems is included as an attachment.

Appendix A contains copies of the three CAFs used during SFY-2023. Included are the: 1) Standard Form – used for community public water systems; 2) Private Form – used for public water systems that are owned by private investors; and 3) Non-Transient Non-Community (NTNC) Form – used for public water systems that provide water to 25 or more of the same individuals, in a non-residential manner, on a daily basis (schools, industries, etc.). At this time a capacity assessment for systems meeting the definition of a Transient Non-Community (TNC) public water supply is not required or performed. However, site visits to TNC are still performed.

## **TECHNICAL ASSISTANCE**

One of the major advantages of the MSDH Capacity Assessment Rating is its ability to aid the department in identifying public water systems that are at risk of becoming unable to provide safe adequate drinking water to their customers. Once systems are shown to have low capacity, efforts are made to provide assistance to improve the systems within the limits of funding. Through grants from EPA, the Drinking Water Systems Improvements Revolving Loan Fund (DWSIRLF) Program funds the Small System Technical Assistance Set-Aside, and the State Program Management Set-Aside. DWSIRLF technical assistance providers and the Bureau of Public Water Supply Staff provide technical assistance at no cost to at-risk water systems.

Technical assistance can take several forms which allow the water system recipients options to improve their technical, financial, and managerial capabilities. The EPA Capitalization Grant set-asides have provided MSDH the ability to contract with technical assistance providers such as Communities Unlimited, Inc. (CU – formally Community Resources Group), Mississippi Rural Water Association (MsRWA), the Mississippi Water and Pollution Control Operators Association (MWPCOA) and the Mississippi State University Extension Service (MSU-ES). The technical assistance providers are able to provide specialized assistance beyond which the MSDH Bureau of Public Water Supply staff can provide. The assistance includes: 1) Comprehensive and Intermediate Technical Assistance provided by MSU-ES; 2) PEER Review Program provided by MsRWA; 3) Board Management Training Coordination provided

by MSU-ES; 4) Hands-On Operator Training provided by MWPCOA and 5) Specific Asset Management training including EPA Core Goals to operator/officials provided by MsRWA. These programs have shown a direct or indirect impact on a system's ability to obtain or remain in compliance with the SDWA.

Annually MSDH determines which public water systems are in the most need of assistance. Based on the previous year's capacity assessment scores and SDWA violations, the technical assistance contractor, and the PEER review program are provided a list of systems to contact to offer assistance. Periodic reports are provided by the contractors to MSDH to confirm that the assistance being provided is benefitting the public water supplies of Mississippi and to inform MSDH of any particular concerns that could require regulatory action or support.

The Comprehensive and Intermediate technical assistance provided through MSU-ES allows the water system officials and staff to receive one-on-one assistance to improve their overall capacity ratings. This type of technical assistance is not voluntary; MSDH develops a list of the poorest performing systems which is provided to the technical assistance contractor. The listed water systems receive a communication notifying them of their selection for technical assistance. Refusing assistance may affect future compliance actions that may be taken on that system, if warranted, by the Compliance and Enforcement Branch of MSDH. The assistance provided is specific and specialized, based on the water supply's needs. It could take the form of obtaining new management policies, financial budgeting, or operational improvements. MSDH Regional Engineering staff may also recommend additional water systems for assistance that they deem are in need of technical assistance; MSU-ES performs an assessment of the system by meeting with the officials and operator. After the assessment, MSU-ES develops a specialized task list of assistance for the system. After MSDH's approval of the specialized task list of assistance for the system, MSU-ES, in cooperation with the system, proceeds to execute the identified tasks. If the system is selected for comprehensive assistance, they can potentially receive the assistance throughout the year. In these instances, it is necessary to ensure that certain policies are implemented and management adjustments are made; MSU-ES monitors the changes throughout the improvement process. Selected intermediate systems are usually identified as having one or two major issues that can be resolved in considerably less time.

The PEER Review program, performed by MsRWA, provides improved technical operations to the water supply staff through operator peer-to-peer interaction. The voluntary program pairs selected water system operators with other water system operators to assist them in preparing for annual MSDH inspections. Similar to comprehensive and intermediate technical assistance, MSDH provides MSU-ES a list of poorly performing systems having Capacity Assessment scores less than 3.0. The technical assistance contractor contacts the referred systems by letter to determine their interest in participating in the PEER Review Program. To ensure that the assistance will have the greatest impact, contact is made with the system's responsible officials as well as the certified operator. Additionally, the technical assistance contractor also advertises the benefits of the PEER Review Program at various trade shows and in publications throughout the year. A water system desiring a PEER Review makes contact with the contractor's personnel, who in turn, coordinate a meeting for all parties involved, including at a minimum the operators/staff on the PEER Review team, the water system operator, and the responsible official(s). At that meeting, all components of the capacity assessment are performed, including an onsite inspection of the water system itself. Additionally, the PEER Review team looks beyond the standard capacity assessment by reviewing other technical, managerial, and financial aspects not previously evaluated. The team also brings each of their unique operational/managerial styles and experience due to the fact they may have encountered many of the same problems. The team approach to problem solving provides an additional boost in capacity assessment areas thereby providing increased operational efficiency, managerial stability, and financial

solvency. Shortly after the review is completed, a report by the PEER Review team is generated outlining the issues raised at the meeting, including suggestions for possible improvements that could be made for the benefit of the water system and its users. Whereas the comprehensive and intermediate assistance emphasizes managerial and financial components, the PEER Review Program primarily emphasizes technical components while providing limited managerial and financial assistance.

The Board Management Training and Coordination Program for Water System Officials assists newly elected water system board members in meeting the requirements of State law. State law requires all newly elected water system board members of private, non-profit water supplies and officials of municipal systems with a population of 10,000 and less; receive training in their duties and management of a public water supply. Mississippi State University Extension Service (MSU-ES) coordinates with the selected training partners, to provide training throughout the state to these public water system officials. Board officials are given training that outlines their duties in managing and overseeing the operation of a public water system and their responsibilities under State law. This training allows the new board members to have the management skills necessary to effectively fulfill their duties. Additionally, the MS Legislature recently modified the existing Board Management Training Law to require an additional 4 hours of updated and advanced training beyond the initial 8 hours of training. The Bureau sees this as very beneficial and appropriate as time has shown that many of the problems facing water system compliance stem from poor management and financial decisions. It can also allow for key updates to be provided such changes to rules of the SDWA, new initiatives like asset management, and EPA's concerns of cybersecurity.

The Hands-On Operator Training conducted by MWPCOA provides small system operators specialized “hands-on” training and skills they need in order to better operate their water systems on a daily basis. Some operators, especially new ones, may not have all the needed skills in order to effectively operate the water system. The training sessions, held throughout the State, provide participants with experience in actual hands-on skills such as meter repair, chlorinator repair, fire hydrant maintenance, leak detection, etc. The operators’ newly acquired skills could lead to potential cost savings to the water system, since operators learn how to make repairs themselves rather than having to hire specialized help. Having the additional skills may in turn improve system performance and capacity.

The Asset Management (AM) Training program conducted by MsRWA provide all systems but in particular small systems the knowledge and understanding of what constitutes proper management of assets that the system has to provide safe and consistent drinking water to their customers on a day-to-day basis. The program presents the key elements of what constitutes an asset, its service level, critical asset identification, life cycle and funding of assets both from the rehabilitation and replacement standpoints. The program also helps systems understand budgeting/audits and setting the proper rates to support care of system assets. At the conclusion of the day-long trainings, attendees have created an initial framework for the management of their assets. This program has incorporated the EPA’s five core elements of asset management into its instructional framework and will be the building block to properly compose a full comprehensive asset management plan. Additionally, the training will serve as a reminder that the AM Plans are living documents and will evolve over time. Assets of the public water system are fluid and are in constant state of flux. New components are brought into service, while others will be retired at some point. This training paired with the Bureau’s developed Asset Management Program Structure should help both operators and their officials have a greater awareness of the infrastructure that is vital to the sustainability of their system.

## 2023 TECHNICAL ASSISTANCE PROGRAM DETAILS

The following provides the details of each of the assistance programs.

### Comprehensive and Intermediate Assistance:

In SFY 2023, Communities Unlimited provided technical assistance to 16 public water systems. The following table lists the systems receiving assistance in SFY 2023 and shows their previous and present Capacity Assessment Ratings; some systems have not been rated since the assistance has been provided and some additional assistance may be necessary after the new ratings are provided.

|    | Systems Receiving Comprehensive Technical Assistance / Intermediate Technical Assistance |           | 2022 Overall Capacity Assessment Ratings | 2023 Overall Capacity Assessment Ratings |
|----|--|-----------|--|--|
| 1  | Town of Sledge (Quitman County)  | No Change | 2.67                                     | 2.67                                     |
| 2  | East Pontotoc W/A (Pontotoc County)  | +0.67     | 2.33                                     | 3.00                                     |
| 3  | City of Itta Bena (Leflore County)   | +0.67     | 1.33                                     | 2.00                                     |
| 4  | Town of Jonestown (Coahoma County)   | +0.33     | 4.00                                     | 4.33                                     |
| 5  | Rome Water System (Sunflower County)   | ‡         | 1.67                                     | ‡  |
| 6  | Sapa Water Assoc. (Webster County)   | -0.67     | 5.00                                     | 4.33                                     |
| 7  | Symonds Water Assoc. (Bolivar County)  | +1.33     | 2.00                                     | 3.33                                     |
| 8  | Town of Goodman (Holmes County)  | ‡         | 3.67                                     | ‡  |
| 9  | Crestfield Water Assoc. (Tate County)  | No Change | 2.00                                     | 2.00                                     |
| 10 | Highway 30 W/A (Union County)  | +2.33     | 2.33                                     | 4.67                                     |
| 11 | Senatobia Lake Estates (Tate County)*  | No Change | 0.33                                     | 0.33                                     |
| 12 | Wilke-Amite W/A (Amite County)*  | +0.67     | 4.33                                     | 5.00                                     |
| 13 | Hurricane Hills W/A (Lafayette County)   | -3.00     | 3.33                                     | 0.33                                     |
| 14 | Arkabutla Water Assoc. (Tate County)   | -0.33     | 2.00                                     | 1.67                                     |
| 15 | City of Indianola (Sunflower County)   | No Change | 2.67                                     | 2.67                                     |
| 16 | Town of Soso (Jones County)  | -0.33     | 5.00                                     | 4.67                                     |

In reviewing the results, the assistance provided assisted 50% of the systems that improved their capacity assessment scores; some systems receiving assistance did regress or made no improvement but

overall some improvement was evident through the use of this technical assistance. Those noted with a “\*” are under a consent order with the Enforcement Section of the Bureau of Public Water Supply and are actively pursuing compliance improvement. Those noted with a “†” did not have a subsequent capacity assessment performed as planned. This is due to significant changes in staffing at the Bureau that limited the number of assessments that could be performed during FY-2023.

#### Board Management Training Program for Water System Officials:

In SFY 2023, Mississippi State University Extension Service successfully administrated 15 training sessions around the state in which 370 board members and managers were trained; this represented 231 public water supplies. Based on data generated after the end of the 2023 contract year (July 2023) there are 2,739 active public water system board members in Mississippi; of this number 464 or approximately 1.81% have not yet participated in a required Board Management Training session.

With the advent of the requirements of additional board management training provided in accordance with state law, MsRWA held 12 advanced board member training sessions held virtually and in person. This advanced training saw 320 board members representing 202 different public water systems.

As seen by the data for each year, the number of board members and managers who have not received the required training has declined each year. Even though there is no standard measurement on how the Board Management Training Program is working, having system officials knowledgeable of the laws, regulations and requirements of how a system should be managed helps the overall operation of the public water supply program. As previous annual reports have noted, BMT is also offered in an online training format to reach officials whose time might be severely limited but still need the valuable information that the training provides. BMT also allows, with periodic curriculum modifications, the introduction of new hot topics such as asset management to the key decision makers. With the recent changes to the Board Management Training Law, the Department will be able ensure that the state public water supplies receive up to date information regarding law changes that will have impacts into the proper management of their public water supplies.

#### PEER Review Assistance:

Since the inception of the Peer Review Program in 2002, three hundred four (304) PEER Reviews have been conducted in the State through the end of the SFY 2022 reporting period. In SFY 2023, fourteen (14) reviews were conducted. The Contractor has a set minimum goal of twelve (12) PEER Reviews which was surpassed. The contractor for this program provides both monthly and quarterly reports of their activities including specific redacted reports of the individual PEER Reviews. Post PEER Review, systems seeking this voluntary program have shown an increase in their capacity assessment scores. The program intends annually to seek a before and after comparison by the contractor of the PEER Review to have a greater understanding of the impact of this assistance.

#### Hands-On Operator Training:

During SFY 2023, MWPCOA was able to provide 0 Hands-On Operator Training session. The lack of trainings was due to the ongoing complications of the pandemic. It is the Department's hope that as pandemic continues to dial down these highly beneficial trainings such as this can resume.

#### Asset Management:

In SFY 2023, MsRWA was able to provide 6 training courses around the state in which included 339 operators and officials; this represented 218 public water supplies. It is particularly encouraging to see a significant number of system officials/managers participate as well as others associated with the systems.

As asset management development strategies show, full system support and involvement from the top down will have a greater impact towards successful AM plans at the system level. As previously mentioned, asset management will be key metric in the state's Capacity Development Program and strategy beginning FY-2024.

#### General Conclusions:

MSDH has found that the majority of public water systems are making efforts to improve even though the Capacity Development Program for existing systems is not mandatory. There are no specific penalties for a water system refusing assistance (which does occasionally occur) or failing to improve/maintain their Capacity Assessment Rating, however, such actions do have inherent consequences. The annual capacity assessment results for all systems are publicized on the MSDH website. Similar to the way the Consumer Confidence Report (CCR) is perceived, a primary goal of the program is for the general public, not just the public water system staff and officials, to take an active role in assuring the quality of their water supply. The general public desires that their utilities be in compliance with laws and regulations, be viable for the future, and provide the best quality water at a reasonable cost.

As always, the additional indirect consequences of failing to take action to improve Capacity Assessment Ratings include: 1) “losing” to neighboring water systems - many neighboring water systems view the capacity rating as a competition to see who has the “best” water system; and 2) receiving lower priority when seeking certain government funding or not receiving funding unless capacities can be improved.

If a public water supply is applying for a low interest improvement loan from the Mississippi DWSRF loan program, the loan program contains priority ranking incentives related to the Capacity Assessment Ratings; also other government agencies such as the Mississippi Developmental Authority (CDBG Program) have included a portion of the Capacity Assessment Ratings in their reviews to evaluate applicants for funding. DWSRF requirements require that when reviewing a project facility plan for a loan application (with a less than perfect Capacity Assessment Rating score) the potential loan recipients must address the deficiencies in their scores. This competition between water systems and their attempts to seek funding results in more viable water systems, which ultimately translates into a benefit to the customers and the general public.

## RESULTS

The efficacy of Mississippi's Capacity Development Program is best demonstrated by the overall trending results of the scores. At the present time there are **1,188** active public water systems in the state; using the Enforcement Targeting Tool List (ETT) from EPA:

The July 2019 report listed 32 systems in the state with health-based violations; of these 16 systems had an ETT score greater than 11.

The July 2020 report listed 22 systems in the state with health-based violations; of these 5 systems had an ETT score greater than 11.

The July 2021 report listed 15 systems in the state with health-based violations; of these 13 systems had an ETT score greater than 11.

The July 2022 report listed 20 systems in the state with health-based violations; of these 14 systems had an ETT score greater than 11.

The July 2023 report listed 17 systems in the state with health-based violations; of these 19 systems had an ETT score greater than 11.

Appendix B contains a complete listing of the Technical, Managerial, Financial, and Overall/Average Capacity Assessment Ratings (scores) of Mississippi's public water systems for SFY-2020, SFY-2021, SFY-2022 and SFY-2023. During the past reporting period the Capacity Assessment Ratings on average have shown a slight increase; the "Yearly State Overall Averages" from the SFY 2014 to SFY 2023 are as follows:

|           |      |
|-----------|------|
| SFY 2014  | 4.41 |
| SFY 2015  | 4.43 |
| SFY 2016  | 4.43 |
| SFY 2017  | 4.40 |
| SFY 2018  | 4.38 |
| SFY 2019  | 4.53 |
| SFY 2020* | 4.47 |
| SFY 2021* | 4.35 |
| SFY 2022  | 4.32 |
| SFY 2023‡ | 4.38 |

\* Denotes that the pandemic has placed limitation on the ability of staff to complete all assessments within the given year.

‡ Denotes staffing difficulties due retirements, losses, and the response to the Jackson Water Crisis that occurred during the fiscal year.

When reviewing the data, the following designations should be considered:

CON – refers to consolidated or merged systems as they were consolidated with other existing water supplies.

NEW – refers to newly created or reactivated water supplies.

COV – refers to systems that did not receive an assessment during prior year when the Coronavirus pandemic prevented normal assessment observations from occurring as normal.

STA – During FY-2023, the program encountered staffing reduction of field services due to retirement and unexpected departure post Jackson Water Crisis. While the capacity assessment of an individual system may not have occurred, state program primacy requirements were met.

Transient, Non-Community Public Water Supplies are not required at this time to have Capacity Assessments performed; however, they are included in the Capacity Assessment listing of systems in Appendix B and are accounted for the total 1190 active public water supplies operating within the state.

## PUBLIC INVOLVEMENT

A primary goal of the Capacity Development Program is for the public, not just the public water systems, to take an active role in assuring the quality of the State's water supply. Customers of public water systems which have received a high rating are encouraged to contact their water system officials to congratulate them for doing an excellent job of operating and managing their water system. Likewise, customers of public water systems which have received a low rating are strongly encouraged to contact their water system officials and request a copy of the system's most recent Capacity Assessment Form. That form will quickly identify the areas where improvement is warranted by the water system. A lower rating could

indicate that the system is more likely to be non-viable and thus unable to protect public health by complying with all SDWA requirements. Customers of such systems are also strongly encouraged to get involved with their water system to ensure that any needed improvements are completed. With the additional funding available to the state's public water supplies, opportunities for needed capital improvement can be pursued at reduced financial impacts to system. Systems have to recognize these opportunities and act on them.

## FUTURE

With the advent some changes to various federal requirements associated with America's Water Infrastructure Act (AWIA), revisions to existing SDWA rules, and the addition of new standards, we could see some systems having difficulty in meeting compliance requirements of some regulations. Rules such as the Ground Water Rule, the Lead and Copper Rule including its recent revisions, and Stage 2 Disinfection By-Products Rule all have standards that must be met. Simultaneous compliance with the various rules could pose significant challenges to many systems within the state. When new compliance challenges arise, there is a period of time where systems adjust to the new or revised regulations. During those periods of time, compliance as well as their capacity assessment scores could suffer somewhat. When specific concerns of regulations are raised, the Bureau strives to be proactive in attempting to address system needs. These needs are addressed through new contractual assistance opportunities to individual systems or creating new training opportunities through the operator certification program by way of our training partners. It is MSDH's intention to provide assistance to ensure that non-compliance is kept to a minimum. MSDH has discovered that it is easier and less costly to help systems maintain compliance by providing targeted technical assistance than by attempting to bring troubled systems back into compliance. We believe that assistance of this type routinely proves better overall compliance rates, the capacity assessment program and water systems' scores.

## ASSET MANAGEMENT & FUTURE INTEGRATION

Based the 2018 congressional legislation, the water supply concepts of asset management and sustainable infrastructure will be a major part of future needs, requirements, and potential financial incentives of water systems. Additional funding provided to the DWSRF program will allow for more specialized assistance in the previously mentioned areas of asset management planning or sustainable infrastructure to the water systems in the State. Furthermore, we believe the Board Management Training of officials of water systems of 10,000 population and less is having a positive impact on capacity assessment scores. Recent Mississippi legislative action will help ensure that board official stay current on new trends and regulations that affect the management and operation of the public water system that they oversee. In the current economic climate, water systems are "doing their best" with less financial and operational resources and hopefully as economic conditions improve, many water systems may make significant infrastructure improvements that may be long overdue. As the concept of Asset Management (AM) has a renewed emphasis with the passage of AWIA, the Bureau will use the Capacity Assessment program as a prime strategy for encouraging its practice. While originally planned during state fiscal year 2021-2022, the Bureau has had to reassess integrating this key sustainable element into its current capacity development program due to the complications associated with previous pandemic and the subsequent fallout and other issues including the Jackson Water Crisis. To give systems further opportunity to prepare, the program has delayed the additional question adding asset management to the current structure the management portion of the assessment to fiscal year 2024. This was done to ensure that systems had ample opportunities to prepare their own plans by utilizing the free offered asset management training offered through a contract by Mississippi Rural Water Association and other training partners and the development of new tools and guidance offered by the Bureau. Beginning fiscal year 2024, the program will pair asset management with questions concerning long range planning. This strategy combined with the Bureau's

ongoing emphasis on the aforementioned AM training contract will be the primary method to push the concept of asset management to the state's public water systems. Additionally, recent national grants awarded by the EPA to National Rural Water Association (NRWA) and Rural Capacity Assistance Partners (RCAP) will filter down to their local representatives. In planning meetings, the Bureau has asked that asset management be given major emphasis in the technical assistance/training agendas of their portion of the grants including awarding regulatory continuing education unit hours to encourage operator participation. Furthermore, the program also hopes to add water audits in the scope of future assessment beginning fiscal year 2025.

## SUMMARY

Through the passage of proper legislation, the strict enforcement of existing laws and regulations, and the implementation of sound capacity assessment and technical assistance procedures, Mississippi continues a Capacity Development Program that has resulted in higher levels of technical, managerial, and financial capacity of new and existing public water systems throughout the State. The program also provides an additional benefit to the public in the form of better utilization of assistance resources and funding. Although no major changes have been made in recent years, the annual evaluation process, along with the Advisory Committee review and public involvement, help to assure that any needed future changes are identified and implemented in a timely manner to evolve the program to meet the needs of the state and the changing regulatory environment.

If there are questions regarding the information presented in this report, or if you have recommendations for improving the Public Water System Capacity Development Program, please contact:

William F. Moody, P.E., BCEE, Director  
Bureau of Public Water Supply  
P. O. Box 1700  
Jackson, MS 39215-1700

| <b>Technical Capacity Assessment</b>   | <b>Point Scale</b>                               | <b>Point Award</b> |
|--|--|--------------------|
| [T1] Does the water system have any significant deficiencies? [ Y N ]  | N - 1 pt.<br>Y - 0 pt.                           |                    |
| [T2] 1) Was the water treatment process functioning properly? [ Y N ] (i.e. Is pH, iron, chlorine, fluoride, etc. within acceptable range?) 2) Was needed water system equipment in place and functioning properly at the time of survey? [ Y N ] (NOTE: Equipment deficiencies must be identified in survey report.) 3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years? [ Y N NA ] (NOTE: All YESs required to receive point)  | All Y - 1 pt.<br>Else - 0 pt.                    |                    |
| [T3] 1) Was the certified waterworks operator or his/her authorized representative present for the survey? [ Y N ] 2) Was PWS Operations record up to date and properly maintained? [ Y N ] (Are minimum days being met based on system classification) 3) Was the water system properly maintained at the time of survey? [ Y N ] 4) Did operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system? [ Y N ] (NOTE: All YESs required to receive point)                             | All Y - 1 pt.<br>Else - 0 pt.                    |                    |
| [T4] 1) Does water system routinely track water loss and were acceptable record available for review? [ Y N ] 2) Is water system overloaded? (i.e. serving customers in excess of MSDH approved design capacity)? [ Y N ] 3) Was there any indication that the water system is/has been experiencing pressure problems in any part(s) of the distribution system? [ Y N ] (based on operator information, customer complaints, MSDH records, other information) 4) Are well pumping tests performed routinely? [ Y N NA ] (NOTE: YES FOR #1 & YES OR N/A FOR #4 AND NOs FOR #2 & #3 required to receive point) | 1)Y - pt.<br>2)N - pt.<br>3)N - pt.<br>4)Y - pt. |                    |
| [T5] 1) Does the water system have the ability to provide water during power outages? (i.e. generator, emergency tie-ins, etc.) [ Y N ] 2) Does the water system have a usable backup source of water? [ Y N ] (NOTE: Must be documented on survey report)   | All Y - 1 pt.<br>Else - 0 pt.                    |                    |
| <b>TECHNICAL CAPACITY RATING = [ ____ ] (Total Points)</b>   |  |                    |

| <b>Managerial Capacity Assessment</b>  |  | <b>Point Scale</b>            | <b>Point Award</b> |
|--|--|-------------------------------|--------------------|
| [M1] Were all SDWA required records maintained in a logical and orderly manner and available for review by the regional engineer during the survey? [ Y N ]  |  | Y - 1pt.<br>N - 0pt.          |                    |
| [M2] 1) Have acceptable written policies and procedures for operating this water system been formally adopted and were these policies available for review during the survey? [ Y N ] 2) Have all board members (in office more than 12 months) completed Board Member Training? [ Y N NA ] 3) Does the Board of Directors meet monthly and were minutes of Board meetings available for review during the survey? (NOTE: Quarterly meetings allowed if system has an officially designated full time manager) [ Y N NA ] (NOTE: ALL YESs or NAs required to receive point. NA - Not Applicable) |  | All Y - 1 pt.<br>Else - 0 pt. |                    |
| [M3] Has the water system had any SDWA violations since the last Capacity Assessment? [ Y N ]  |  | N - 1pt.<br>Y - 0pt.          |                    |
| [M4] Has the water system developed a long range improvements plan and was this plan available for review during the survey? [ Y N ]   |  | Y - 1pt.<br>N - 0pt.          |                    |
| [M5] 1) Does the water system have an effective cross connection control program in compliance with MSDH regulations? [ Y N ] 2) Was a copy of the MSDH approved bacti site plan and lead/copper site plan available for review during the survey and do the bacti results clearly show that this approved plan is being followed? [ Y N ] (NOTE: All YESs required to receive point)  |  | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>MANAGERIAL CAPACITY RATING = [ ____ ] (Total Points)</b>  |  |                               |                    |

| <b>Financial Capacity Assessment</b>  |  | <b>Point Scale</b>            | <b>Point Award</b> |
|---|--|-------------------------------|--------------------|
| [F1] Has the water system raised water rates in the past 5 years? [ Y N ] (NOTE: Point may be awarded if the water system provides acceptable financial documentation clearly showing that a rate increase is not needed, i.e. revenue has consistently exceeded expenditures by at least 10%, etc.)                                      |  | Y - 1pt.<br>N - 0pt.          |                    |
| [F2] Does the water system have an officially adopted policy requiring that water rates be routinely reviewed and adjusted as appropriate and was this policy available for review during the survey? [ Y N ]   |  | Y - 1pt.<br>N - 0pt.          |                    |
| [F3] Does the water system have an officially adopted cut-off policy for customers who do not pay their water bills, was a copy of this policy available for review by the regional engineer, and do system records (cut-off lists, etc.) <u>clearly</u> show that the water system effectively implements this cut-off policy? [ Y N ]   |  | Y - 1pt.<br>N - 0pt.          |                    |
| [F4] Was a copy of the water system's officially adopted annual budget available for review by the regional engineer and does the water system's financial accounting system clearly and accurately track the expenditure and receipt of funds? [ Y N ]   |  | Y - 1pt.<br>N - 0pt.          |                    |
| [F5 - Municipal Systems] 1) Was a copy of the latest audit report available for review at the time of the survey? [ Y N ] 2) Does this audit report clearly show that water and sewer fund account(s) are maintained separately from all other municipal accounts? [ Y N ] (NOTE: Yes answer to all questions required to receive point.) |  | All Y - 1 pt.<br>Else - 0 pt. |                    |
| [F5 - Rural Systems] 1) Was the latest financial report / audit report available for review? [ Y N ] 2) Does the latest financial report show that receipts exceeded expenditures? [ Y N ] (NOTE: Yes answer to both questions required to receive point)   |  | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>FINANCIAL CAPACITY RATING = [ ____ ] (Total Points)</b>  |  |                               |                    |

MISSISSIPPI STATE DEPARTMENT OF HEALTH

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria  
01 July 2022 - 30 June 2023**

**Technical Capacity**

**T1 Does the water system have any significant deficiencies?**

**T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within - 0.5 of target pH (approximately 8.4, Langlier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.

**T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?**

Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.

**T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed. This can include tanks that are a part of the treatment process including clearwells.

**T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?** Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.

**T3 (2) Was the operations record up to date and properly maintained?** Operations record: CI2 recorded as required, pH, Fe, Fluoride, and phosphate where applicable. Did operations record indicate the minimum required operator presence was performed based on system classification?

**T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.

**T3 (4) Did the operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.

**T4 (1) Does water system routinely track water loss and were acceptable records available for review?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly.

**T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Service logs may be checked at time of survey.
- T5 (2) Does the water system have a usable backup source of water?**
- Managerial Capacity**
- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 (1) Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits, wastewater requirements) and subdivision/line extension policy (written procedure requiring developer/system obtain MSDH approval before construction begins) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Flushing program (flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept.), Updated distribution map (can be updated by operator), or SARA Tier II (report of hazardous chemicals, quantity, location provided to local and state fire, law and EOC's).
- M2 (2) Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy) available for review. This does not apply to Municipalities with population over 10,000.
- M2 (3) Does Board meet monthly and were minutes of Board meetings available for review?** Allow quarterly meetings with full time manager. Manager must be appointed by the board and documentation of appointment provided.
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a long range improvement plan and was this plan available for review?** Hydraulic analysis, engineering report, completed State Needs Survey Form or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years. Plan in use should indicate progress towards improvements. Water systems need to provide proof of annual review by the governing body of the water system.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

**Financial Capacity**

- F1** **Has the water system raised water rates in the past 5 years?** Credit also allowed if revenue exceeds expenditures (excluding out of pocket for major improvements and depreciation) by 10% for past five years.
- F2** **Does the water system have an official policy requiring rates routinely reviewed and adjusted if necessary?** Must be in minutes showing adopted
- F3** **Is the water system following an official cut off policy?** Must be published (in minutes or on bills), must follow policy (cut off customers who by policy should be cut off)
- F4** **Was a copy of system's adopted annual budget available for review and does financial accounting system clearly and accurately track receipts and expenditures?** Must provide copy of budget and balance sheet (income statement) for review.
- F5** **Was a copy of the latest audit report (Municipal) available for review? Were water and sewer fund accounts separate from other accounts?** List of violators, copy in records, can accept CPA audit report
- F5** **1) Was the latest financial report/audit report available for review? copy in records, can accept CPA audit report. 2) Does the latest report show that receipts exceed expenditures?** Excluding out of pocket for major improvements

| [M5] 1) Does the water system have an effective cross connection program in compliance with MDH regulations? [Y N] 2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed? [Y N]<br><br>(NOTE: All YESs required to receive point) | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>MANAGEMENT CAPACITY RATING = [ ] (Total Points)</b>   |                               |                    |

| <b>Financial Capacity Assessment</b>  | <b>Point Scale</b>            | <b>Point Award</b> |
|---|-------------------------------|--------------------|
| [F1] Does the water system have a PSC issued certificated service area? [Y N]   | Y - 1pt.<br>N - 0pt.          |                    |
| [F2] Has the water system petitioned PSC for a rate increase within the past five years? (NOTE: Point may be awarded if the water system provides acceptable documentation clearly showing that a rate increase is not needed, i.e., revenue has consistently exceeded expenditures by at least 10%, etc.) [Y N]  | Y - 1pt.<br>N - 0pt.          |                    |
| [F3] Does the water system have an officially adopted cut-off policy for customers who do not pay their water bills, was a copy of this policy available for review by the regional engineer, and do system records (cut-off lists, etc.) <u>clearly</u> show that the water system effectively implements this cut-off policy? [Y N]                             | Y - 1pt.<br>N - 0pt.          |                    |
| [F4] Was a copy of the water system's officially adopted annual budget available for review by the regional engineer and does the water system's financial accounting system clearly and accurately track the expenditure and receipt of funds? [Y N]   | Y - 1pt.<br>N - 0pt.          |                    |
| [F5] 1) Are annual financial reports routinely filed with the Public Utility Staff and were copies of these reports available for review by the regional engineer at the time of the survey? [Y N] 2) Does the latest financial report show that system receipts exceed expenditures? [Y N]<br><br>(NOTE: Yes answer to both questions required to receive point) | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>FINANCIAL CAPACITY RATING = [ ] (Total Points)</b>   |                               |                    |

MISSISSIPPI STATE DEPARTMENT OF HEALTH

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria  
01 July 2022 - 30 June 2023**

**Technical Capacity**

**T1 Does the water system have any significant deficiencies?**

**T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within - 0.5 of target pH (approximately 8.4, Langlier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.

**T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?**

Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.

**T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed. This can include tanks that are a part of the treatment process including clearwells.

**T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?**

Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.

**T3 (2) Was operations record up to date and properly maintained?** Operations record: CI2 recorded as required, pH, Fe, Fluoride, and phosphate where applicable. Did record indicate the minimum required operator presence was performed based on system classification.

**T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.

**T3 (4) Did the operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.

**T4 (1) Does water system routinely track water loss and were acceptable water loss records available for review by the regional engineer?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly.

**T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Service logs may be checked at time of survey.
- T5 (2) Does the water system have a usable backup source of water?**
- Managerial Capacity**
- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 (1) Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits, wastewater requirements) and subdivision/line extension policy (written procedure requiring developer/system obtain MSDH approval before construction begins) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Flushing program (flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept.), Updated distribution map (can be updated by operator), or SARA Tier II (report of hazardous chemicals, quantity, location provided to local and state fire, law and EOC's).
- M2 (2) Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy) available for review. This does not apply to Municipalities with population over 10,000.
- M2 (3) Does Board meet monthly and were minutes of Board meetings available for review?** Allow quarterly meetings with full time manager. Manager must be appointed by the board and documentation of appointment provided.
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a long range improvement plan and was this plan available for review?** Hydraulic analysis, engineering report, completed State Needs Survey Form or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years. Plan in use should indicate progress towards improvements. Water systems need to provide proof of annual review by the governing body of the water system.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

**Financial Capacity**

- F1 Does the water system have a Certificate of Need and Necessity (certificated service area) issued by PSC?** Copy of tariff or PSC filings
- F2 Has the water system petitioned PSC for a rate increase in the past 5 years?** Credit given if the water system provides acceptable documentation clearly showing that receipts consistently exceed expenditures by 10%.
- F3 Is the water system following an official cut off policy?** Must be published in tariff or lease agreement, must follow policy (cut off customers who by policy should be cut off).
- F4 Was a copy of system's adopted annual budget available for review and does financial accounting system clearly and accurately track receipts and expenditures?** Must provide copy of budget and balance sheet (income statement) for review.
- F5**
  - 1) Does the water system file annual financial reports with PSC and copy available for review?** Must provide copy.
  - 2) Does the latest financial report show that receipts exceed expenditures?** Excluding out of pocket for major improvements.

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria  
01 July 2022 - 30 June 2023**

**Technical Capacity**

**T1 Does the water system have any significant deficiencies?**

**T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within - 0.5 of target pH (approximately 8.4, Langlier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.

**T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?** Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.

**T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed. This can include tanks that are a part of the treatment process including clearwells.

**T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?** Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.

**T3 (2) Was operations record up to date and properly maintained?** Operations record: CI2 recorded as required, pH, Fe, Fluoride, and phosphate where applicable. Did record indicate the minimum required operator presence was performed based on system classification.

**T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.

**T3 (4) Did the operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.

**T4 (1) Does water system routinely track water production and were acceptable records available for review?** Requires master meter or annual pump test with run time. Must show calculating water production at least quarterly.

**T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report.
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Credit not given for renting generator w/o contract. SYSTEM MAY PROVIDE BOTTLED WATER IF INCLUDED AS PART OF A PUBLISHED EMERGENCY PLAN. Service logs may be checked at time of survey.

**T5 (2) Does the water system have a usable backup source of water?**

**Managerial Capacity**

- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have Job Description for Employees associated with potable water system (employee handbook) and Emergency or Contingency plan (chain of command, phone numbers, etc.), plus at least one of the following: Construction policy (written procedure requiring MSDH approval before construction begins), Flushing program (flushing schedule w/records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/fire dept.), Updated distribution map (can be updated by operator), or SARA Tier II (report of hazardous chemicals, quantity, location provided to local and state fire, law and EOC's).
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a preventative maintenance schedule and was this plan available for review?** Maintenance schedule for: wells (including annual pump tests), service pumps, tank inspections, with recommendations and corrective action taken. Documentation must be available for review.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.
