REPORTING OF SPONTANEOUS FETAL DEATHS

DEFINITION OF FETAL DEATH

"Fetal death" means death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles.

The purpose of this manual is to assist each facility in completing the Report of Spontaneous Fetal Death available through our Electronic Fetal Death Registration system.

QUESTIONS

If clarification, additional information, or assistance is needed regarding the reporting of a fetal death, contact your Vital Records Field Representative, Vital Records Fetal Death Registration or the State Registrar.

If any members of a plural set were born alive, write a note in "user notes" for members born specifying which members of the set were born alive. Similarly, if any members of a plural set were delivered in another county or state, write a note in "user notes" stating where the other members of the set were born.
